## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or fairly suggest the limitations of independent claims 1, 6, 14, and 16, wherein speech recognition specifies a character string as a non-specific (or specific) instruction type operation character string, a request level is determined on the basis of speech features, and an object to be operated is specified based on the operation character string and the request level. Specification, Page 7, Lines 3 to 22, identifies a desire type character string as a non-specific instruction type operation character string, e.g. "I feel hot" or "I am hungry", and a corresponding specific instruction type operation character string as "Turn on the air conditioner" or "Find a restaurant", respectively. Request level determination operates on the basis of change in loudness, pitch, or speed of voice to determine what response to provide. Thus, if the user says, "I feel hot", a first level response is to provide an indication of the temperature inside the vehicle, a second level response is to provide an indication of a question as to whether the user wishes to operate the air conditioner, and a third level response is to provide an instruction to operate the air conditioner. (Specification, Page 9)

Generally, it is known for speech recognition to determine an emotion or mood of a speaker from speech features as well as words spoken. However, the invention as claimed is directed to executing an instruction based upon a level of emphasis in a

request. The prior art of record does not disclose or fairly suggest determining a response based on a combination of a character string provided by speech recognition and a request level on the basis of speech features, wherein a non-specific instruction type operation character string is differentiated from a specific instruction type operation character string.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
